UI & Icon Design –

Logo and icons I designed in Figma, then built into Unity.

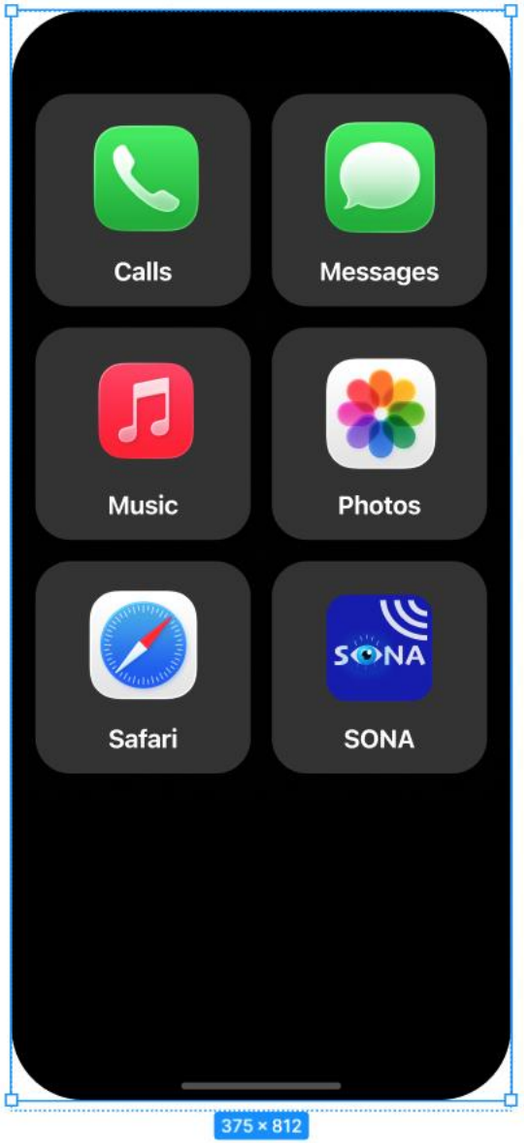

Feature Icons & Voice Characters –

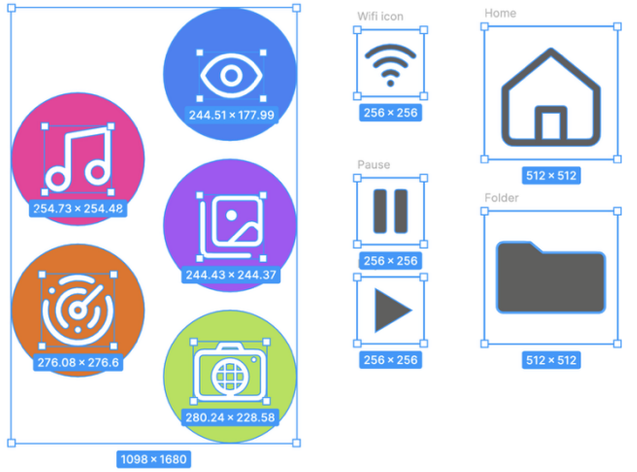

Colour-coded feature icons, plus two dog avatars for warning voices.

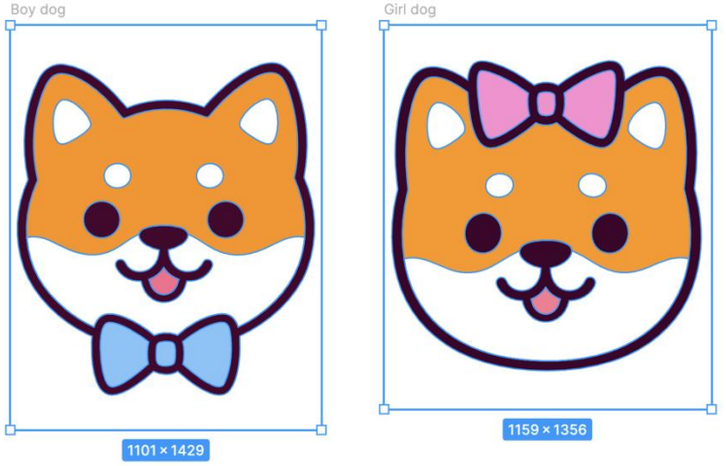

SONA App is the world's first real-world elderly and visually impaired assistive application that combines real time Visual SLASM with YOLO-World object detection.

Phone screen easy mode with SONA

Sign In –
Three login states: default, account created, and error.

Setup & Home Menu –
Language and voice setup, then a colour-coded home menu.

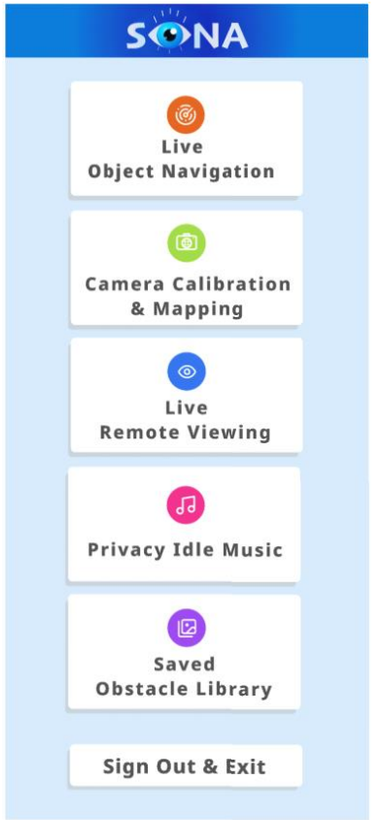

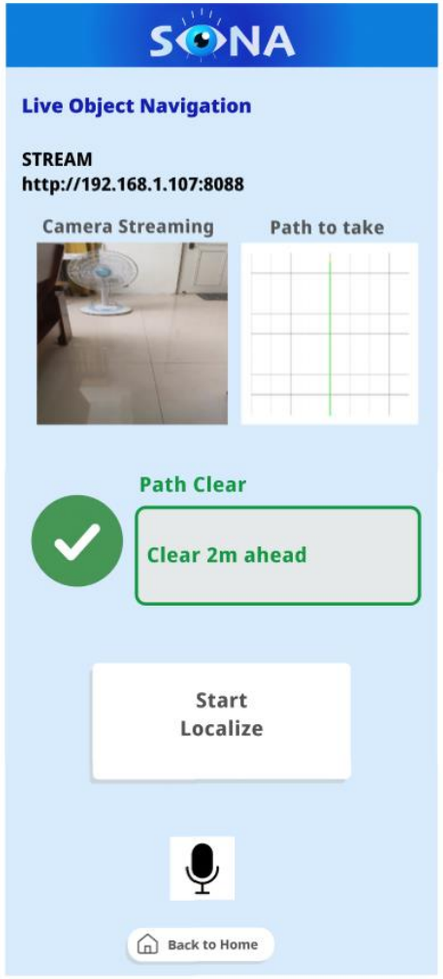

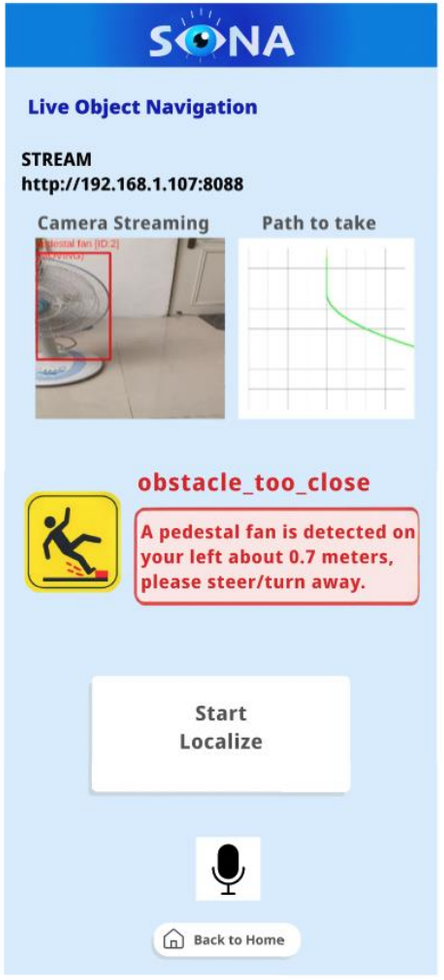

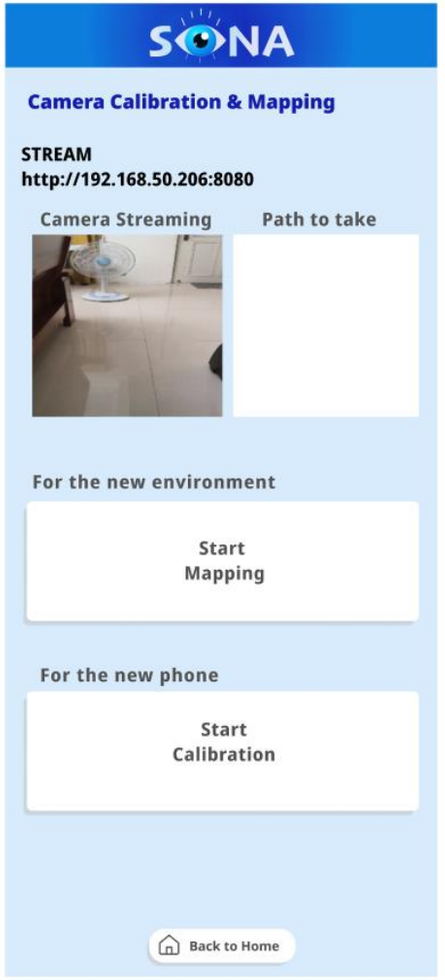

Conrad Pang
Application ref no: 805987609

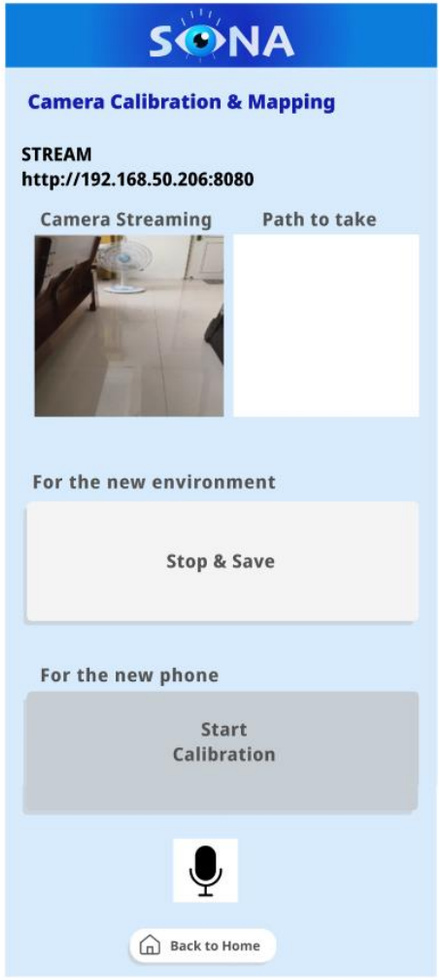

Live Object Navigation –
Detects obstacles, reroutes path, and warns by voice with distance.

Camera Calibration & Mapping –
Calibration maps new environments and adapts to new phone cameras.
